Study

Learning goes way beyond sitting and listening these days; students, whether in a university or a corporate training facility, need active spaces for constructing knowledge, testing outcomes, and presenting solutions to the class. Tables that move, fold, nest, and provide a platform for technology are prerequisites for any classroom configuration.

Group

Student-centered spaces. Reciprocal teaching. Social connections and a sense of belonging. Interaction is the new instruction, and tables play a major role in defining the space and making groupwork work.

*iQ Plus table with Moonlit Silver
base, Luna Shadow laminate top, and
Ebony edge.*

Berco not only offers tables for any classroom or training room application, but also for any budget, with our Basic, Better, and Best Collections.

Sense

Providing durable style at an entry level price point just makes sense for many classroom settings. Sense is a great selection when your project involves multiple training rooms and budget is on the syllabus. The line's tubular steel base with machine-cut column and 6" x 8" steel plate connector are a common sense solution for today's learning environments.

Starfire

With students controlling their learning spaces and styles more than ever before, a table that stands up to pushing, pulling, and daily rearranging can be a real asset. Starfire's sturdy, stable cast iron construction and well-engineered leg will withstand everything from frequent movement to bumps, and even students leaning on tables during informal learning.

Voyager

Over 40 years and still going strong, Voyager is Berco's core curriculum. Voyager offers a wide array of options, along with upgraded construction for stability, strength, and long life.

AnyWay

When you don't want the table to be the focus, AnyWay is the perfect choice. The flat foot found on all AnyWay tables is intentionally non-intrusive for eyes and feet, allowing the space itself to soak up the attention.

Mobi

Mobi majors in mobility. With so many new ways to learn, the ability to move furniture to transform a room from classroom to student meeting space, or from small to large group discussions has never been more important.

Telesto

If sustainable is on the syllabus, you can't beat Telesto. Made with 80% reclaimed aluminum and other eco-friendly features, Telesto makes the grade when it comes to green.

iQ Plus

For high-tech training and class rooms, iQ Plus scores high. Contemporary styling pairs with tech-friendly features to create the ideal table for today's learning environments.

- Recycled aluminum pedestals are 100% recyclable
- Integrated, hidden wire-management capability maintains an uncluttered look in your space
- Deluxe German-engineered casters roll easily over hard floors and carpet and resists movement when bumped, especially important in high-traffic spaces or when tables are wired together
- Oval-shaped column and offset foot design provide a sleek contemporary look

iQ Plus table with Chrometal base, Black Nebula laminate top, and Ebony edge. With Powernet modesty panel.

OUR POINT OF DIFFERENCE

Berco prides itself on having achieved the expertise and capabilities of much larger furniture companies, while maintaining the flexibility and responsiveness you expect from a small company. Here are just a few of the things that make us different:

- No order is too small (or too large) for Berco.
- We love special orders...custom sizes, shapes, or special features are just part of what we do.
- We find solutions. Bring us a challenge, and our team won't rest until we've found the ideal solution for you.
- Our Customer Service is personal, and it is relentless. Our people will do whatever it takes to find and get you the tables you need for your project.
