Network

When it comes to meetings today, tablets, texts, and tweets have replaced notebooks and pens, and larger-than-life tables and podiums are being replaced with non-traditional spaces that build energy, taking meetings to a whole new level.

Connections

Inclusive, interactive, and orchestrated from an iPad; top-notch technology combines with inspired room layouts to cultivate creativity and get results. Increasingly, meeting spaces help make connections, from weekly conference calls to the boss's birthday celebration, and everything in between.

*Voyager table with Chrometal base,
Golden Cherry veneer and edge.*

Berco not only offers tables for any meeting or conference room application, but also for any budget, with our Basic, Better, and Best Collections.

Berco Basic Collection

Sense

When design and budget need to meet in the middle, Berco Sense makes perfect sense. The line's durable style and entry-level price point make it a great selection when your project involves multiple meeting spaces, requiring a clean look and industry-standard construction.

Starfire

Everyone is working harder these days, including corporate conference spaces, which often have to serve more than one function, from important client presentations to company social events. Starfire's sturdy, stable cast iron construction and well-engineered leg will stand up to pushing and pulling, allowing you to rearrange your room for its countless uses.

Voyager

Upgraded construction and stability meet flexibility... Voyager truly is a meeting of the minds. Perfect for meeting spaces of all sizes and intended uses, from niches for one-on-one meetings to large conference rooms.

AnyWay

If you're looking for a table design to complement any conference, one that won't overshadow the space or the work being done there, look no further than AnyWay. Its slim, clean base stays out of the way, allowing the space itself to shine.

Titan

If the strategy for your space includes sleek design and flexibility, Titan is your strongest choice. Its 2" and 3" diameter footless post legs won't get in the way of the meeting or your design vision.

Voluma

Conferencing is far from commonplace with Voluma, with its specially constructed cylinder base and wide range of size, shape, edge profile, end panel, and technology options. Flat panel base also available.

iQ Plus

No more shuffling of paper handouts... iQ Plus makes smart, interactive meetings possible with its wide range of technology options, allowing participants to charge, connect, and share with ease. And all with a sharp modern look for today's most capable companies.

Vortex

Inspiration can come from virtually anywhere in a meeting, including the room itself. Let them know there's something special about this space when you choose the timeless trumpet-shaped Vortex base for your meeting room.

Discus

Keep any group energized over a day of meetings with Discus. The classic flat base provides a non-intrusive place for participants' eyes (and feet) to rest. Spun steel lends substance to the look of the space as well as strength and stability.

Excalibur

The exchange of ideas requires finesse, and that's where Excalibur excels. Its combination of solid bar stock steel and a slim base profile make it the perfect choice for boardrooms, heavily used meeting spaces, and any application with solid surface tops.

OUR POINT OF DIFFERENCE

Berco prides itself on having achieved the expertise and capabilities of much larger furniture companies, while maintaining the flexibility and responsiveness you expect from a small company. Here are just a few of the things that make us different:

- No order is too small (or too large) for Berco.
- We love special orders...custom sizes, shapes, or special features are just part of what we do.
- We find solutions. Bring us a challenge, and our team won't rest until we've found the ideal solution for you.
- Our Customer Service is personal, and it is relentless. Our people will do whatever it takes to find and get you the tables you need for your project.
